

CMC awarded AIC for a new shear

CMC awarded AIC for the power control and automation of a new Shear at Rancho Cucamonga, CA facility.

After the cession to CMC from GERDAU, Rancho Cucamonga plant confirms the perfect harmony of working together with AIC on new projects by confirming a new drive and automation control for the intermediate shear at rolling mill. AIC has already upgraded stands and shears drives and controls.

Shears motors are configured in Master-Follower configuration and Control is confirmed to be based on Allen Bradley platform, which AIC is Recognized system integrator.

The upgrade will reduce Opex and replace all obsolete systems present at site.

Commissioning of the Shear is scheduled within 2019.

AIC is a global system integrator providing advanced and tailored automation solutions for the steel industry, with the aim to continuously improve both efficiency, competitiveness and safety of the production processes. With more than 1000 applications worldwide and more than 40 years of history, AIC can boost an unique experience in both greenfield and revamping projects in long products rolling mills and continuous casting machines.
