

Final Acceptance Certificate for Robotic Tagging Island at RIVA Cerveno

RIVA has signed Final Acceptance Certificate for the Robotic Tagging Island at Cerveno rolling mill.

Fully automated robotic tagging island has been installed by AIC at RIVA Cerveno facility together with a improved data tracking system at site to follow material and automatically print the tag to be applied at bundles of finished products. Installed system reduces downtimes due to improved tracking system and reduces the number of total personnel dedicated to tagging tasks.

AIC has been supplying the full automation of the robotic tagging island together with new finishing end area pulpits integrated inside the robotic container, all turnkey plant.

AIC continuously develops its systems and having more installations to come in 2019.

AIC is a global system integrator providing advanced and tailored automation solutions for the steel industry, with the aim to continuously improve both efficiency, competitiveness and safety of the production processes. With more than 1000 applications worldwide and more than 40 years of history, AIC can boost an unique experience in both greenfield and revamping projects in long products rolling mills and continuous casting machines.
