

AIC has been chosen by Caleotto (Feralpi Group) for a new production line.

Caleotto SPA, company of Feralpi Group that specialises in producing wire rod for value-added special steel, has entrusted AIC to be involved in the upgrade of the rolling mill through the supply of power control & automation cabinets for the new Garrett line, in cooperation with the mechanical supplier.

In addition to this main job AIC has been commissioned for the design and supply of a complete CCTV system for the monitoring of the new line and to modify, upgrade and expand the existing AIC recipes system, as well as the tracking and level2 platform according to the new production configuration.

It's the first time that Caleotto relies on AIC for the automation of its plants and this project is an additional step of the collaboration between AIC and Feralpi group, which have been cooperating for the last 45 years for automation and tying machines projects.

About Companies:

AIC Group is a technological partner with extensive experience and deep know-how and stands itself as a global power control supplier and system integrator designing, manufacturing, and implementing automation systems, process control, and mechatronic solutions for both greenfield and revamping projects. Focusing on the steel and metals industries for long and flat products, the Group provides cutting-edge technical solutions by handling complex project schedules and thus establishing satisfactory and remarkable partnerships through its 6 international offices.

More than 45 years of modernization for endless reliability processes.

Caleotto was founded in 1896, is part of the Feralpi Group and specializes in rolled billets in wire rod for high value-added special steel.
